

# Diferent types of Text Styling

Welcome to RML. This paragraph has not been styled.

This paragraph HAS been styled, using a style defined in the <stylesheet> section.

This paragraph uses the same style as the first paragraph, but the fontsize has been overridden. paraStyles can inherit from each other. You can also use html-style **bold** and *italic* tags.

This paragraph has been styled, but not using the stylesheet. It just uses style attributes inside

it's own <para> tag.
